

Almond
AVIJOR

The Avijor variety has a late flowering and it's self-fertile.

AGRONOMIC CHARACTERISTICS

RIPENING DATES*	2 to 14 September
FLOWERING DATES *	3 to 17 March
VIGOUR OF THE TREE	Medium
PRODUCTION	High
GROWING HABIT	Semi-open
SELF-FERTILE	Yes

CHARACTERISTICS OF THE VARIETY

SHELL HARDNESS	Semi-Hard
SHELLING YIELD %	35-38%
DOUBLE KERNELS	Less than 5%
KERNEL WEIGHT (GR)	1,30 grams
KERNEL SHAPE	Long

*The "Ripening dates" and "Flowering dates" refers to Ebro valley.

NOTE: "The fruit of any tree will change from farm to farm depending on the farmer's cultural practices, particularly with regard to pruning and fertilising, as well as differences in soil and climate variations. In vigorous young trees the date of ripening and fruit characteristics will differ from those of mature trees. Over time, the normal characteristics of the variety will develop as the tree matures. Over fertilising young trees to increase the vigour, can have a detrimental effect on the quality of the fruit and or the productivity"
